#### **Ninjutsu: History and Tradition**

Widely considered a martial arts classic, Ninjustu: History and Tradition is the perfect introduction to the techniques, weapons and philosophy on Japan's stealth warriors... the ninja. Learn about taijutsu - the ninja's unarmed combat system. See the ingenious weapons developed by the ninja to outwit enemies. And the methods they used to hide and evade capture. You'll discover more to this art than devastating combat techniques. It's a path to spiritual enlightenment, where you can realize your full potential -- both mentally and physically. Author Dr. Masaaki Hatsumi, grand master of togakure ninjutsu, reveals the true nature of the ninja based on fact...not Hollywood myth. Loaded with photos. 8.9 x 5.9 x 0.6 inches. 240 pages. \$12.95.

#### **Compact scope delivers dazzling views with GoTo ease**

#### **Orion™ SkyView Pro™ GoTo Maksutov-Cassegrain**

Experience a fantastic visual voyage into the wonders of the cosmos...with performance and features you'd only expect from higher-priced telescopes. The Sky View Pro 127mm comes equipped with a GoTo computer controller and motor drive. Just select an object from the controller's database of 13, 400+ celestial bodies. The dual stepper motors smoothly align the scope to your target with unerring precision and keeps it in view at 3.4 degrees per second. No tedious manual adjustments.

You'll be amazed at the high-resolution images from a scope that's only 14.5"long. Its 1540mm aperture delivers stunning detail of the moon's surface, exceptional views of the planets, and captures remarkable celestial sights from deeper space. Want to move your scope from the backyard to the backwoods? Safely stow and transport the tube assembly in the water-resistant, polyester carrying case -- free with your order!

The EQ mount guarantees smooth, steady movement from a rock-solid base.

This telescope package comes equipped with 8x40 finder scope that makes it a snap to scan the skies with a wide-angle view. Plus, a 90° star diagonal assures comfortable viewing from any position. Also includes two Sirius Plossl eyepieces, 25mm and 10mm, developed with the same precision as sophisticated military optics -- reducing light scatter and delivering stunning contrasts. And the snug rubber eye guards stop leaks from ambient light.

Orion provides flexibility for your budget and your needs. You can choose our SkyView Pro in its standard configuration and easily add the GoTo controller and tract motor system later. One year limited warranty.

The GoTo controller requires external 12-volt power system -- we recommend the Dynamo Pro (#2307).
